

T5mini-report

What was done this week?

- We met two times this week;
- Finished Requirements specification (without latex part)
- Discussed our plans for the next week
- Analyzed other team's jobs to make a better understanding of our overall goal

What issues/risks/blockers do you have?

- Planning our meetings (everyone was available at different times)

What is the goal for next week?

- We will fully prepare the Requirements specification for the next Friday (will make corrections if needed and we need to write everything in latex)
- We will start working on Technical specification

What is the overall status?

- For our team Green
- For the whole project Yellow; We still need to decide what we are going to do with area 3
